PROJECT

Pharmacy Management System
05/2023 – 07/2023
Technology Used: JAVA, SQL, Spring Boot, Hibernate, MySQL, Eclipse, Postman.
- A Pharmacy Management System is a software application designed to manage and automate various tasks and processes within a pharmacy or drugstore. It helps streamline operations, improve efficiency, and enhance patient care.
- Also, the main advantage of this project is that it uses Information Technology. The User only needs basic products like a computer and an internet connection.

Book Store Management System
Technology Used: JAVA, SQL, Spring Boot, Hibernate, MySQL, Eclipse, Postman.
- Book Management Systems are a great way to monitor books, add them, update information in it, search for the suitable one, issue it, and return it when needed.
